Broward Metropolitan Planning Organization

Continuity of Operations Plan (COOP)

JUNE 2019
Broward County, Florida

Richard Blattner
MPO Chair

This Continuity of Operations Plan (COOP) was prepared by the Broward Metropolitan Planning Organization (MPO) to develop, implement and maintain a viable COOP capability. This COOP complies with applicable internal agency policy, local and state regulations, and supports recommendations provided in the Federal Emergency Management Agency’s (FEMA) Federal Preparedness Circular 65. This COOP has been distributed internally within the Broward MPO and with external agencies that may be affected by its implementation.

For complaints, questions or concerns about civil rights or nondiscrimination, or for special requests under the Americans with Disabilities Act, please contact: Erica Lychak, Communications Manager/Title VI Coordinator at (954) 876-0058 or lychake@browardmpo.org.

I. EXECUTIVE SUMMARY

This document describes and specifies the Broward Metropolitan Planning Organization (MPO) Continuity of Operations Plan (COOP). The purpose of this Plan is to provide guidance to Broward MPO staff on the policies and procedures to follow in the event of an interruption of services due to a natural disaster or other emergency. The primary goal is to allow the Broward MPO to resume its normal operations and functions as quickly and completely as possible after the interruption.

The COOP includes descriptions of the Broward MPO’s mandated principal activities and the individuals and organizations for which they are provided. A listing of key personnel, tools and facilities required to perform these functions is also part of this document. The COOP, also referred to as the Plan, will allow one to quickly identify what is provided by the organization and to assemble the staff and resources necessary to continue operations in the event of a disaster, emergency, or other interruption of services. Included are procedures for the order of succession and personnel notification.

The Plan describes response to events requiring Broward MPO assistance, continuation of Broward MPO essential functions, office evacuation, relocation, and restoration procedures.

Questions concerning this Plan should be directed to:

Greg Stuart, Executive Director
Broward Metropolitan Planning Organization
100 West Cypress Creek Rd, Suite 650
Fort Lauderdale, FL 33309

(954) 876-0035
stuartg@browardmpo.org
II. INTRODUCTION AND PURPOSE

The primary mission of the Broward Metropolitan Planning Organization (Broward MPO) is to collaboratively plan, prioritize and fund the delivery of diverse transportation options. Broward MPO staff members, under the direction of the Broward MPO Board, develop transportation plans and programs for the urbanized area of Broward County. These activities include long and short-range planning and coordination of multimodal transportation services such as transit, roadway, pedestrian, bicycle, greenways, seaport, airport, rail and the movement of freight and goods.

The Broward MPO Board is composed of elected officials charged with transportation decision-making responsibilities. The Board is assisted by three federally mandated advisory committees: the Technical Advisory Committee (TAC), which offers technical expertise and advice; the Citizens’ Advisory Committee (CAC), which provides public input and direction; and the Transportation Disadvantaged (TD) Local Coordinating Board (LCB). Using the COOP as a reference manual, communication and coordination is facilitated with these four key groups (MPO, TAC, CAC and LCB) following a crisis or disaster.

The COOP will serve as a guide to staff as they continue to support these organizations in response to an emergency, as well as provide the usual products and services that the Broward MPO provides to the residents and visitors of Broward County. The MPO office is located at: Trade Centre South, 100 West Cypress Creek Road, 6th Floor, Suite 650, Fort Lauderdale, FL 33309.

The Broward MPO office will be the COOP Control Center unless rendered unavailable or if an evacuation has been ordered by the Broward Emergency Response Team (BERT), located at the Emergency Operations Center (EOC), Plantation, Florida. If the offices are not available due to damage or hazard, refer to Appendix C for alternative sites for staff activities, including meetings of the MPO and advisory committees.

The purpose of this COOP is to provide the conditions for continuous performance of essential operations during a crisis, disaster, or other debilitating loss of resources; ensure the safety of the staff; protect essential equipment, records, and other assets; reduce disruption of operations; minimize damage and losses; achieve an orderly recovery from emergency operations; identify relocation requirements; and ensure operational and managerial requirements are met before an emergency occurs. This Plan outlines activities before and after a crisis, disaster, or other debilitating loss of resources, which is termed “incident” in this Plan. It also outlines contingencies to mitigate, prepare for, respond to, and recover from an incident.
III. LEVELS

Throughout this document, activation levels are referenced. The Broward MPO follows the Florida State Emergency Operations Center (EOC) Activation Levels which are defined as follows:

https://www.floridadisaster.org/sert/eoc-activation-levels/

LEVEL III: Monitoring & Assessment

Level III is typically a monitoring and assessment phase where a specific threat, unusual event, or situation, is actively monitored by the EOC. A Level III activation is an internal process and involves little, if any, inter-agency direction or coordination. The threat, unusual event, or situation simply warrants observation, verification of appropriate action, and follow-up by staff.

LEVEL II: Partial Activation

Level II partial activation is typically limited agency activation. The COOP Leader (Section 5A1) lead agencies with a role in the incident response are activated and required to report to the EOC. All other emergency support functions are alerted of the event and are on standby. The purpose of Level II activation is to initiate preparations due to a significant threat of a disaster or to coordinate response due to the occurrence of a minor disaster.

LEVEL I: Full Activation

All primary and support agencies are notified. The COOP is in full effect and all necessary Operations Phases will be conducted. In a full-scale activation, the COOP is activated on a 24-hour schedule due to an imminent threat or occurrence of a disaster.
IV. NOTIFICATIONS AND ESSENTIAL FUNCTIONS

When an emergency or crisis is declared, the Executive Director or designee shall notify the MPO Chair and will begin implementation of the COOP. Once the COOP is implemented in response to an incident, it will immediately affect all Broward MPO staff and will involve notification of the following authorities:

<table>
<thead>
<tr>
<th>A. Broward MPO Board</th>
<th>Chair and members</th>
</tr>
</thead>
<tbody>
<tr>
<td>B. Technical Advisory Committee (TAC)</td>
<td>Chair and members</td>
</tr>
<tr>
<td>C. Citizens’ Advisory Committee (CAC)</td>
<td>Chair and members</td>
</tr>
<tr>
<td>D. Transportation Disadvantaged (TD) Local Coordinating Board (LCB)</td>
<td>Chair and members</td>
</tr>
<tr>
<td>E. Florida Department of Transportation (FDOT)</td>
<td>Secretary</td>
</tr>
<tr>
<td>F. Federal Highway Administration (FHWA)</td>
<td>Division Administrator</td>
</tr>
<tr>
<td>H. Federal Transit Administration (FTA)</td>
<td>Regional Administrator</td>
</tr>
</tbody>
</table>

The Executive Director or designee shall also notify all MPO staff. MPO staff contact information (including personal phone numbers and email accounts, if available) is updated by the MPO’s Human Resources Administrator or designee and the latest information is provided to all staff in a Level II activation or emergency event.

In addition to the above notifications, the following are those essential functions, in priority order, that should be performed by the Broward MPO, to the maximum extent feasible:

1. Ensure, in coordination with the MPO host agency, the integrity of data and records relating to internal and external mandates, responsibilities and administrative operations. Maintain and/or restore access to data and other resources immediately after an event.

2. Restore communication with MPO, TAC, CAC, and LCB members; arranging, advertising, and holding regularly scheduled or emergency meetings as soon as feasible.

3. Maintain or reestablish contact with appropriate internal and external authorities and agencies, including the MPO host agency.

4. Provide technical support to assist in planning and restoration of Broward’s transportation systems.

5. Ensure that the integrity and compliance of the Broward MPO’s planning programs are maintained and products and services are delivered.

6. Provide servicing of MPO agreements, maintain grant invoicing and payroll.
V. CONCEPT OF OPERATIONS

A. Phase I: Activation and Relocation

1. Decision Process

The COOP will be activated by the Broward MPO Executive Director or Chief of Staff, at their discretion, as a response to a Level II activation of the Broward Emergency Operations Center or an emergency event, such as a terrorist attack, natural disaster, or other incident. The purpose of Level II activation is to initiate preparations due to a significant threat of a disaster or to coordinate response due to the occurrence of a minor disaster.

In the event the Executive Director or the Chief of Staff is not available, responsibility for initiating and implementing the COOP will devolve onto the next Broward MPO staff member in the chain of command (Section 5A4a). The person assuming the Broward MPO staff’s lead role in executing the COOP will be known as the “COOP Leader.” It is expected that the COOP Leader’s action will either be an obvious response to external circumstances (for example, a nearby industrial accident affecting day-to-day operations) or a command or directive from a higher authority such as the Broward MPO Board or a Broward Emergency Response Team (BERT) mobilization.

2. Alert, Notification and Implementation Process

At the time of a Level II activation, staff with working files located on their local C: drive will copy the files to their folders on the appropriate network drive (M:\GroupShared).

If the possibility exists that Level II activation may occur during non-working hours the Executive Director or designee will determine if Level II activation should occur prior to an official activation. At a minimum, staff will take laptops home and move monitors/CPUs to designated “protected” areas such as the Administrative Conference Room, Server Room, inside offices, or Storage Rooms located in the MPO Office or MPO Board Room. Upon leaving the office, all office doors must be closed.

Upon Level II activation for weather/hurricane related emergency, the COOP Leader will call a meeting and set in motion the COOP.

- Staff not present will be notified by telephone and email by the COOP Leader or designee. In the event the activation occurs after working hours, the COOP Leader or designee will initiate telephone contact or send email that will reach all employees through their pre-recorded contact information on the Master Employee Contact List, which is maintained by the Human Resources Administrator or designee.

- It will be the responsibility of those who are not reachable to establish contact with the COOP Leader, Executive Director or Chief of Staff within 24 hours of the Level II activation.
3. Staff Responsibilities

The following procedures will be initiated by staff members at the primary work facility if they are present at that facility when the emergency is declared:

- Secure all necessary files and computer equipment and back up or record all essential data on a USB flash drive, the MPO server, or backup files to Microsoft OneDrive using Office 365 account. Each staff member can access their OneDrive Folder by logging into https://login.microsoftonline.com using their domain logon credentials. Files left on your PC may not be available. By going to the link below, staff can log into the web version of Outlook to view their emails. Web Outlook can be accessed through any web browser using domain logon credentials: https://outlook.office365.com

- Verizon MiFi devices will be issued to the Executive Director, Chief of Staff and, the Chief Financial Officer, or others as deemed necessary, prior to leaving the office. These devices will provide a secured wireless internet network to staff while away from the office.

- Record a brief, generic message on the main switchboard line (954-876-0033) like this (see Instructions in Appendix I):
  
  “Thank you for calling the Broward Metropolitan Planning Organization. Our offices are currently closed due to (choose one) Tropical Storm/Hurricane ________.”

- Everyone should record or update the outgoing messages on their phone before being sent home for an approaching storm like this (see Instructions in Appendix G):
  
  “You have reached the voice mail box for ________. Our office is currently closed due to Tropical Storm/Hurricane _____. I will return your call when our office reopens.”

- Everyone should activate a brief out-of-office message on their email account like this:
  
  “Our office is currently closed due to Tropical Storm/Hurricane ________. I will reply to your email when our office reopens.”

- A message should be placed on the website calendar and under What’s New stating:
  Office closed due to Tropical Storm/Hurricane ________.

In the event of a storm, minimize water and wind damage by:

- Covering or closing/locking all desks, cabinets and storage areas.
- Close office doors

- Disconnect computer hardware and electrical equipment, and bag delicate equipment and paper files.

- Follow established building procedures as described in the appendix.
4. Leadership

a. Order of Succession
The table below lists the chain of command for the Broward MPO staff’s COOP Leader. If the senior ranking staff member is incapacitated or out of the area at the time of activation the next ranking staff member will assume his or her duties.

<table>
<thead>
<tr>
<th>Successors: “Chain of Command”</th>
</tr>
</thead>
<tbody>
<tr>
<td>Greg Stuart</td>
</tr>
<tr>
<td>Mike Ronskavitz</td>
</tr>
<tr>
<td>James Cromar</td>
</tr>
<tr>
<td>William Cross</td>
</tr>
<tr>
<td>Kim Giles</td>
</tr>
<tr>
<td>John Robertson</td>
</tr>
</tbody>
</table>

b. Delegation of Authority
The Broward MPO Executive Director or their immediate successor in the list above if the Executive Director is not available, will be in authority and will be known as the COOP Leader. The Executive Director may appoint a successor outside of the chain of command, or change the order of the chain of command in the event of special circumstances, to succeed him/her.

c. Devolution
The primary function of the MPO is transportation planning, not the physical construction nor the day-to-day operation of transportation facilities. However, should an event occur, the MPO’s planning priorities are to provide financial support necessary to maintain the existing transportation system and provide for payment to those associated with MPO agreements and contracts.

In the event of a worst-case scenario, in which the Broward MPO offices are completely destroyed and/or leadership is incapacitated, the organization should be prepared to transfer all of their essential functions and responsibilities to personnel at a different office or location and MPO functions may be handled at a lower staff level.

The Florida Department of Transportation and Federal Highway Administration have file copies of the Broward MPO’s major planning documents, including the Long Range Transportation Plan, Transportation Improvement Program, Unified Planning Work Program, grant invoicing packages, consultant contracts and Joint Participation Agreements should it become necessary for the MPO to reestablish itself. Other documents, including but not limited to the ILA to establish the MPO and the Florida Commission for the Transportation Disadvantaged Planning Grant Agreement should reside on the MPO server.
B. Phase II: Alternate Facility Operations

Given the MPO latest technology and IT system, it is possible for MPO staff to work remotely from home or other locations and have access to most files and programs as they would at the MPO offices. However, based on the event, circumstances and judgement of the COOP Leader, an alternate facility may be needed to perform the essential functions of the MPO. If an alternate facility is needed, upon arrival at that facility, the COOP Leader will delegate shifts for available staff, and assign staff to test the facility’s internet connection, set up computers, establish email, and test telephone land lines. Telecommuting may also be an option once a base of operations is established.

Potential Alternate Facility Locations:

The District 4 FDOT at 3400 West Commercial Blvd. Fort Lauderdale has indicated that “In a disaster situation that renders the Broward MPO offices inoperable, FDOT is willing to offer space to the Broward MPO providing there is sufficient space available. If space is not available, FDOT will assist the MPO in locating a suitable location.”

Refer to Appendix C for additional alternate locations.

The COOP Leader, when determining an alternate location from the locations listed in Appendix C, should take into account the following parameters:

♦ Sufficient space and equipment
♦ Capability to perform essential functions within 12 hours, up to 30 days
♦ Reliable logistical support, services, and infrastructure systems
♦ Consideration for health, safety and emotional well-being of personnel
♦ Interoperable communications (land line telephones, ability to use cell phones from a sheltered position, internet connectivity, fiber optic cable connection to relevant offsite servers and databases, etc.)
♦ Computer equipment and software

Various Municipal Government Locations will be investigated to conduct MPO Board, TAC, CAC, LCB, and other meetings as the need arises.

Hosted Workstation and Server Environment

The Broward MPO has outsourced its IT functions to All Covered Care which handles all of the organizations shared file hosting, servers, and workstations. All hosted e-mail and Microsoft functionality is handled through Office 365 – a fully hosted solution by Microsoft managed by All Covered for the Broward MPO. Broward MPO staff operates in a hosted workstation environment that utilizes provisioned servers in an off-site location to act as remote workstations. This solution allows staff to access their workstations from any Windows-based machine using remote desktop connection. This includes access to the Broward MPO shared files.
The Broward MPO shared drives are hosted and backed up in two locations, Virginia and Texas, utilizing All Covered’s hosted server solution. Each location contains a redundant backup of the Broward MPO shared files and files are maintained in a RAID configuration in the event of hard drive failure. These files are always accessible through the hosted workstation environment using remote desktop connection. In addition, the MPO’s website is hosted and managed by Daruma Tech. The following table provides the contact information for the MPO’s hosted services.

</tbody>
</table>

Hardware

At Level II activation by the Broward EOC or at the direction of the Executive Director or Chief of Staff, the MPO’s IT staff will begin preparing the portable hard drives/USB Drives/servers for removal and relocation. Monitors/CPUs should be moved to designated “protected” areas such as the Administrative Conference Room, Server Room, or Storage Room located in the MPO Offices or MPO Board Room. Plastic bags will be placed over the computers, monitors, and large displays for added protection. Staff will take laptops home and the remaining laptops will be stored in the designated laptop cart and moved to one of the “protected” areas.

IT administrative staff will also be responsible for shutting down all local servers and network devices (network switches, modems, battery backup devices, etc.) in order to ensure the hardware is protected from any power surges or failures. IT administrative staff must also notify the All Covered Help Desk of the network shutdown in order to avoid triggering alerts in the IT monitoring system. IT administrative staff must also notify Intent Digital to take voting system offline, and that UPS battery backup will be taken out of service. Before departing the MPO offices, IT administrative staff will be responsible for ensuring all other sensitive IT equipment is properly disconnected and stored.

General Specifications for Laptops

Thirty (30) laptops will be needed. All staff members have been assigned a laptop and will utilize these devices for the COOP activation. All of these devices have been configured with remote session access through All Covered’s hosted workstation environment. Alternatively, staff will have a copy of the remote desktop connection shortcut on a flash drive for use on any Windows-based machine in the event there is an issue with laptop provisioning.
From the available laptops, four (4) will be needed for running GIS applications and of these, two (2) will also be running graphics and 3D modeling applications. Three (3) laptops will be needed to run the SERPM transportation model. The remaining eighteen (18) laptops would be standard business grade laptops.

All the laptops have a built-in web camera to enable video conferencing. All laptops have built-in WIFI connections.

**Software**

Since most of the MPO’s software is cloud based and accessible remotely from available laptops, only a limited number of software systems need to be installed at, or made portable so they can be transferred to, the alternative location. The following lists those systems which must be transferred.

<table>
<thead>

</tbody>
</table>
C. Phase III: Disaster Recovery and Restoration Procedures

Once disaster recovery is underway and the MPO offices are suitable for occupancy, the following procedures are to be followed to bring the office and staff back to a normal working environment.

- MPO staff should report to work at the MPO offices as directed by the Executive Director and/or COOP Leader.

- IT administrative staff will be responsible for reestablishing and testing network services at the MPO offices including internet connectivity, IP phone connectivity, local server connectivity, and print/scan devices. The All Covered Help Desk must also be notified in order to resume active monitoring of the MPO’s network and devices.

- IT administrative staff will be responsible for reestablishing back up power to MPO Board Room technology. Intent Digital must also be notified in order to bring all equipment back online.

- MPO staff will be responsible for reconnecting their respective laptops, telephones and other office equipment which was disengaged prior to the event. The IT administrative staff may provide assistance if needed.
VI. COOP PLANNING RESPONSIBILITIES AND MAINTENANCE

Maintaining the COOP is an ongoing endeavor which should be conducted by the COOP Leader under the direction, supervision and support of the MPO Executive Director. The COOP will be formally reviewed each year prior to June 1. The personnel and emergency telephone lists will be reviewed and updated quarterly. The following identifies those responsible for COOP activities.

<table>
<thead>
<tr>
<th>Responsibility</th>
<th>Position</th>
</tr>
</thead>
<tbody>
<tr>
<td>Annual update of the COOP Plan</td>
<td>COOP Leader</td>

<td>COOP Leader</td>
</tr>
<tr>
<td>Conduct periodic exercises</td>
<td>COOP Leader</td>
</tr>
<tr>
<td>Plan and evaluate periodic exercises</td>
<td>COOP Leader</td>
</tr>
</tbody>
</table>

VII. TEST, TRAINING AND EXERCISES (TTE)

An exercise should be conducted annually prior to the start of hurricane season on June 1. COOP plans should include:

- Individual and team training of agency personnel
- Periodic internal agency testing and exercising of COOP plans and procedures
- Testing of alert and notification procedures
- Refresher orientation for COOP personnel
- Joint interagency exercising of COOP plans, if appropriate

VIII. MULTI-YEAR STRATEGY AND PROGRAM MANAGEMENT PLAN (MYSPMP)

The COOP will be formally reviewed each year prior to June 1. It is not anticipated that the MPO will require a MYSPMP.

MEMORANDUM

TO:                All Tenants
FROM:              Alicia Litchfield
DATE:              May 23, 2019
RE:                Atlantic Hurricane Season

Please be advised that the 2019 Atlantic hurricane season begins on June 1st. Cardinal Point has developed a contingency plan in the event the Broward County Area should be threatened by a hurricane. The plan consists of many phases based on the status of the alerts being issued by our local county and city emergency management teams. We have step by step procedures to notify each tenant in the event we determine one or more of our buildings will be impacted by inclement weather. If the area is threatened by a storm, and a hurricane watch is issued, you will receive further specific instructions from this office concerning any potential shutdown procedures and the schedule for implementation.

An emergency contact form is attached for your convenience. Please provide us with current names, titles, phone numbers and e-mail addresses to facilitate the communication process in the event the area is threatened by a storm that requires advance preparation and coordination.

Also, the following link is for your use, it is a Broward County Hurricane Link. This guide will provide you general information and recommended actions to take in the event of a storm. You can also receive additional information from both the city and county emergency management offices.

Please do not hesitate to contact me if you have any questions.

Alicia Litchfield

Hurricane Preparation and Building Shut-down Procedures
Cardinal Point Management, LLC
PLEASE READ CAREFULLY!

There are generally three scenarios or conditions that would initiate an emergency shut-down of a Cardinal Point property. They are listed below.

Emergency Operations Center ("EOC") Evacuation Order - Issued at County level
This order is due to an expected Hurricane making landfall close enough to the South Florida area that residents/occupants in flood zones are asked to evacuate. Mandatory evacuation orders are normally issued by the EOC at least 14 hours in advance and often preceded by voluntary evacuation requests.

Cardinal Point initiates a building shut down
Cardinal Point senior management may make a decision to initiate a building shut down due to the potential of extreme weather conditions in an area where a mandatory evacuation issued by the EOC would not take place. The primary purpose for such actions is to minimize the risk of flood and or wind damage to the building’s mechanical and electrical systems and components. Through proactive intervention, Cardinal Point can minimize the potential for storm related damage and the accompanying delay in the ability of a tenant to operate its businesses once the storm passes.

FPL initiates power outage
FPL has been known to shut off power to selected areas in order to prevent underground equipment damage due to flooding. In most cases FPL will use the media to disseminate this information. In some extremely adverse conditions, where life safety becomes a critical issue, FPL will cut the power and announce its actions later. Should FPL announce a power grid shutdown, Cardinal Point will initiate building shutdown procedures to safeguard building systems.

Please Note: In the event of an impending hurricane, once the winds reach a sustained 39 mph all emergency medical services and rescue operations will be suspended by the local authorities. This is one of several reasons why Cardinal Point may elect to close a building prior to receiving a EOC Mandatory Evacuation Order.

A Hurricane Watch will be issued by the National Weather Service if predictions indicate the possibility of hurricane conditions within 36 hours. All tenants should activate their individual emergency preparedness plans and be prepared for subsequent issuance of a Hurricane Warning and potential evacuation.

A Hurricane Warning will be issued when hurricane conditions are expected within 24 hours. By this time, your preparations for the storm's arrival should be completed and evacuations will commence as directed by local authorities. Please review the attached building evacuation zone chart and identify your building's evacuation zone.
HURRICANE PREPARATIONS:

As part of the pre-season and pre-storm preparations, Cardinal Point personnel will inspect each building for hurricane preparedness, but each tenant should also make their own emergency preparedness or business continuity plan. Excellent resources for preparing these plans may be found at the following sources.

- www.floridadisaster.org
- www.ready.gov/business/index.html

Your business will be asked to assist with basic building preparations within your specific suite prior to a storm:

- Any items stored outside of the premises should be secured or moved to an interior location.
- Prior to vacating the premises, confirm that all electronic appliances and computers have been turned off and unplugged, and any critical business resources secured or removed.
- Ensure all employees are out of the building, all doors are shut to offices with exterior windows and your main entrance doors are locked.

EVACUATION ORDER:

Once local authorities have issued mandatory evacuations instructions, or one of the scenarios above exist, Cardinal Point personnel will initiate building shutdown procedures. At such time, tenants will have a 4-6-hour window to carry out and complete their internal shut down procedures within their own suite. **TIME IS OF THE ESSENCE.** The sooner each tenant can complete their shutdown, the sooner Cardinal Point can complete the closure of the entire building, secure the structure, and join their families in a safe location. If the directive to shut down the building was given during non-business hours we would contact you via the emergency contact information provided.

Once the decision is made to shut down the building, no management or tenant staff will be allowed to remain inside. We appreciate your understanding and compliance with this policy.

AFTER THE STORM

Tenants should continue to monitor radio or television broadcasts for additional instructions and re-entry orders from the EOC. **Once the EOC issues a Phase Three or Unlimited Re-entry policy for your area, we request that no tenant or employee attempt to access the building without first establishing contact with a Cardinal Point representative to confirm the building is safe for Re-entry.** This coordination will allow our staff to properly and safely reactivate the building services. In general, following an announcement that a geographic area is safe for re-entry, we request a four-hour window to safely reactivate the building services. **Only KEY tenant personnel responsible for your business operations and systems should return to the building to commence start-up procedures in your suite.** Cardinal Point will reach out to the KEY personnel identified via the emergency contact information provided. If you have not already done so, please provide or confirm your information as soon as possible using the attached form.

Thank you in advance for your assistance and cooperation in these matters. Should you require any additional information, please feel free to contact the Property Manager.

Appendix F. Emergency Evacuation Procedures (Evacuation Drill)

Safety Committee Team Leaders / Alternates: Greg Stuart, Mike Ronskavitz, James Cromar, Kim Giles, Monica Diaz

ZONE 1

Monica Diaz / Paul Flavien

Responsible for Guests using the MPO Board Room and Adjoining Conference Room Areas. *(Bring the sign-in sheets).*

ZONE 2

James Cromar / Paul Calvaresi

Team Members: James Cromar, Monica Diaz, Paul Flavien, Paul Calvaresi, ULI: Julie Medley, Mallory Barker, Eralda Agolli, Max Helden.

ZONE 3

Kim Giles / Anthea Thomas

Team Members: Anthea Thomas, Erica Lychak, Ricardo Gutierrez, Buffy Sanders, Peter Gies, Hannah Bourgeois AND Guests using the Executive Conference Room. *(Bring the sign-in sheets).*

ZONE 4

Greg Stuart / David Clark

Team Members: Greg Stuart, Bill Cross, David Clark, Chadwick Blue, Charlene Burke, Conor Campobasso, Lydia Waring, Juan Canez AND Guests using the Administrative Conference Room.

ZONE 5

Mike Ronskavitz / Carl Ema

Team Members: Mike Ronskavitz, Jihung Chen, Tracy Flavien, Veleta Williams, Carl Ema, John Robertson, Christopher Restrepo, Rebecca Schultz, Michele Danza.

Team Leader Duties

- Upon hearing a fire alarm, do not wait for more information or to ascertain the cause of the evacuation, actively encourage staff / visitors / vendors within your area to PROCEED IMMEDIATELY TO THE NEAREST EMERGENCY EXIT! Alert others to the danger as you leave.
- Check those areas that you would pass on your way towards fire exits. If possible, if you are the last person out close doors as you head toward the exit.
• Use the nearest staircase and walk down quickly. Always keep to the right when walking down the staircase.

• **Do Not Use Elevators!**

• Note: For persons unable to use exit stairs; those with limited mobility, etc. Staff may attempt to assist person(s) but if they are unable to, then escort them to the fire stairwell landing, and instruct them to wait until emergency response arrives. Use phone to call 911 to alert and inform emergency services of person(s) that have remained on the floor or in the stairwell, Staff will continue to exit the building.

• Evacuate the building and proceed immediately to the Designated Meeting Place where everyone will meet up to be accounted for. The designated place at the Trade Centre is at the Tri-Rail Station on the *Northern* side of the platform nearest to our building. Once we have accounted for everyone, we will wait until the building has been deemed safe to return. **Do not re-enter the building until the building security or emergency services gives clearance.**

**TRADE CENTRE SOUTH MESSAGE:**

The fire exit stairwell doors are tied into the fire alarm panel and are for exit only unless in case of emergency. Once the fire alarm goes off the doors release.

There are three (3) emergency stairwells in the building. One on the north side, south side and center of the building. *The evacuation floor plans are posted in the elevator lobby* also.

Our stairwells have a smoke evac system to prevent smoke from filling the stairwells.

The doors are locked during normal business hours as they are for emergency use exit only. This is also a safety precaution so that people can’t just walk into your space from the stairwell.

**Tips for Using Fire Extinguishers:**

A portable fire extinguisher can save lives and property by putting out a small fire or containing it until the fire department arrives; but portable extinguishers have limitations. Because fire grows and spreads so rapidly, the number one priority for residents is to get out safely.

• Use a portable fire extinguisher when the fire is confined to a small area, such as a wastebasket, and is not growing; everyone has exited the building; the fire department has been called or is being called; and the room is not filled with smoke.
To operate a fire extinguisher, remember the word **PASS**:
- **P**ull the pin. Hold the extinguisher with the nozzle pointing away from you, and release the locking mechanism.
- **A**im low. Point the extinguisher at the base of the fire.
- **S**queeze the lever slowly and evenly.
- **S**weep the nozzle from side-to-side.

Read the instructions that come with the fire extinguisher and become familiar with its parts and operation before a fire breaks out.

Keep your back to a clear exit when you use the device so you can make an easy escape if the fire cannot be controlled. If the room fills with smoke, leave immediately.

Know when to go. Fire extinguishers are one element of a fire response plan, but the primary element is safe escape.
Appendix G. Instructions for Accessing Telephone Communications and Retrieving Messages

From outside of the system, the process for accessing your voicemail remotely:

- Dial your 10-digit phone number (954-876-______)
- When you hear your voicemail greeting, press * (star)
- You will be transferred to the auto attendant for the main 954-876-0033 number, when you hear the automated message, press * (star) again
- You will be asked to enter your extension. This is your four-digit internal extension (10______)
- You will be prompted to enter your voicemail password (enter your voicemail password)

The above steps will grant you access to your individual mailbox. You will also be able to manage your voicemail from this voice menu, including mailbox greetings.

Everyone should record or update the outgoing messages on their phone before being sent home for an approaching storm. Again, something short such as:

“You have reached the voice mail box for _______. Our office is currently closed due to Tropical Storm/Hurricane _____. I will return your call when our office reopens.”

Email: Everyone should activate an auto reply on their email account. Place a brief message, such as:

Thank you for your email. Our office is currently closed due to Tropical Storm/Hurricane _______. I will reply to your email when our office reopens.

Website:

A message should be placed on the website Calendar and News & Updates stating:
Office closed due to Tropical Storm/Hurricane _______.

Appendix H. MPO Boards Contact Information

The MPO Boards (MPO, TAC, CAC, LCB) contact lists are to be updated and produced by the MPO Board Coordination Manager upon request. The latest information should be collected and distributed to staff upon activation of Level II.
Appendix I. Instructions to Change the Temporary Greeting on the Mitel Auto-Attendant

HOLIDAY/TEMPORARY GREETINGS –

Recording and enabling a holiday or temporary greeting will override both the day and night greetings for the amount of time that you desire. Once you record a generic holiday greeting ("We are closed for the holiday" versus "We are closed for Memorial Day"), that same greeting can be easily enabled.

To record the HOLIDAY/TEMPORARY GREETINGS greeting:

1. Press the programmed "Voice Mail" key or dial 6000
2. Press * until the system asks you to "Please enter your mailbox number"
3. Mailbox number is 9999
4. Passcode is ----
   • The system will play” To begin a new installation and erase the current one, press 1” (Do not select this option. Move on to the next step)
5. Press 4 for Greetings
6. Press 1 for Primary Greetings
7. Press 3 to record a temporary system Greeting (the existing greeting will play)
8. Enter the number of days to use the temporary greeting
   a. To enable the greeting for same day only, enter one
   b. Include the day that the greeting is enabled when specifying how long the greeting is to be used (i.e. If you want to the holiday greeting to play on Saturday, Sunday, and Monday, but you enable on Friday, enter 4 days)
   c. At the end of the specified time period, the standard greetings will go back into place
   d. If you wish to disable the holiday greeting prior to the end of the scheduled time, follow steps 1 – 8 and enter zero when prompted for days to use temporary system greeting
9. Record new greeting, press any key when finished
10. Follow prompts to review, re-record, etc.
11. When complete press 1 to save the message
12. Press the * key until you get disconnected from system
