City of Coral Springs

Mobility Hub Research / In-Person & Online Surveys

Purpose

The Broward Metropolitan Planning Organization (BMPO) contracted with HNTB and Quest Corporation of America (Quest) to gather data regarding the community's mobility experience in the identified area of Coral Springs Downtown to create a planning framework for a mobility hub project.

To assess mobility improvements as part of the planning phase, in-person surveys (English, Spanish and Creole) were conducted. Additional surveys were also conducted online. The data collected will help identify Broward County Transit (BCT) transportation service usage and user perception in Coral Springs' study area.

Methodology

On Monday, October 21, the Quest team conducted in-person surveys targeting qualified respondents, in this case, those observed using Broward County Transit bus services (BCT Routes 2, 34 and 102) in the study area (Sample Road / University Drive bus stops) and those riding the community shuttles. The online surveys were posted online and shared via the City's communications outlets from October 14 through October 25.

In order to provide a broad collection of opinions to ensure a confidence level of 95% and a margin of error of 5%, the goal was to collect data from 100 riders in the study area and 100 surveys online.

Coral Springs Community Shuttle services two routes (blue and green) from 8 a.m. to 5 p.m. weekdays and noon to 5 p.m. on weekends. As ridership boarding and alighting vary on the routes, surveys were conducted on the bus.

Studies show that peak BCT ridership countywide is on weekdays from 7 a.m. to 9 a.m. and 4 p.m. to 6 p.m.

Survey questions focused on the following:

- Bus route used
- Purpose of visitation (using bus/shuttle) to the study area
- Frequency of use
- Mode of secondary transportation in the area (Transportation Network Companies (TNC), walking or cycling) used to reach final destination, when applicable
- Pros and cons of the current transit service

The in-person survey were available in English, Spanish and Creole and completed on wireless tablets with data collected through an online portal.

Results Summary

In-person bus surveys (104) and community shuttle on-board surveys (43) were completed on Monday, October 21, from 6 a.m. to 6 p.m. Online surveys (149) were completed between October 17 through 25.

Peak ridership periods for the BCT in-person surveys were from 6 a.m. to 8 a.m. and 4 p.m. to 6 p.m. Surveys were collected at five bus stop locations at University Drive and Sample Road:

42.31%	Bus Stop 2596 (University Dr, S of Sample Rd – SB) (Routes 2, 102)
21.15%	Bus Stop 216 (Sample Rd / University Dr, SE corner – EB) (Route 34)
16.35%	Bus Stop 234 (Sample Rd / University Dr, NE corner – WB) (Route 34)
14.42%	Bus Stop 2290 (University Dr, S of Sample Rd. Library – NB) (Route 2)
5.77%	Bus Stop 2226 (University Dr, N of Sample Rd – NB) (Routes 2, 102)

In-Person Survey Respondents Alighting/Boarding BCT Service

50.96%	Bus Route 2
37.50%	Bus Route 34
11.54%	Bus Route 102

Of those that use the BCT bus service to the area, 80.77% use it very frequently (more than five times a month), 6.73% use it four-to-five times a month, 6.73% used it two-to-three times a month, and 5.77% use it once in a month.

The majority of the riders or 70.19% arriving to the Coral Springs Downtown area transfer to another bus. Of the total respondents, only 11.54% use the BCT service to stay in the Coral Springs Downtown area (work, school, library, hospital/medical, city hall, shop, dine, bank or other) with 10.58% of the respondents attending school in the immediate area. Of those who transfer to a bus and responded, the majority are going to work or high school outside the Coral Springs Downtown area.

The majority of bus riders preferred not to comment about their likes and dislikes; though, 49.98% expressed satisfaction and 22.12% expressed no dislikes with service at the location. Dislikes of the service location varied with some citing bus frequency (7.69%) and punctuality (4.81%) as concerns.

It is important to note that the majority of the bus riders observed alighting in the Sample Road / University Drive area were boarding another bus to reach their final destination. Those alighting from the bus routes servicing the area crossed the street and/or walked around the corner to board a bus route traveling in the opposite direction. Route 34 travels east/west and Routes 2 and 102 travel north/south.

Community Shuttle On-Board Survey Respondents

74.42%	Green Shuttle Riders
25.58%	Blue Shuttle Riders

Of the respondents:

9.30%	Connected with BCT bus
16.28%	Transferred to another community shuttle to reach a destination
79.07%	Use the shuttle more than five times a month

The majority of shuttle bus riders were satisfied with the service and used it frequently to get around. Most

passengers using the service spoke either Haitian-Creole or Spanish. The bus drivers are very familiar with the passengers. It was observed that bus stop signage is either missing or damaged along the routes.

Online Respondents

Of the total respondents:

- 81.88% live in Coral Springs
- 20.81% work in Coral Springs

Of those who responded to not living or working Coral Springs, half have never been to Coral Springs.

Of the total respondents, 53.25% have used a Transportation Network Company (i.e., Lyft or Uber) and 30.20% have not.

The majority (92.62%) of those that responded to the online survey, do not or have not used public transportation (BCT or community shuttle) to visit Coral Springs Downtown and only 7.38% have used public transportation (BCT or community shuttle) to visit Coral Springs Downtown.

Of the 7.38% who responded as using public transportation to the Coral Springs Downtown area: 36.36% used BCT and 36.36% used the community shuttle and infrequently. Most wished not to respond or only used it once or three times or less. The respondents used public transportation to the area for the following reasons:

- 18.18%: Visit the library
- 18.18%: Attend a special event
- 9.09%: Visit City Hall
- 9.09%: Shop
- 9.09%: Attend school
- 9.09%: Dine in the area

Convenience (27.27%) was cited as the majority reason for liking the service and frequency (45.45%) was cited as a reason they do not like the service.

For those who do not or have not used public transportation to the area, cited the following reasons as why they have not used public transportation to the area (multiple answers were provided):

- 29.61% Use/prefer the convenience of driving own vehicle (have a car)
- 28.29% Not being familiar with public transportation
- 9.87% Pick-up locations
- 9.21% Schedule
- 7.24% Frequency
- 4.61% Bus destinations
- 0.66% Cost to ride

If improvements were made to the reasons cited, only 35.51% said that they would be willing to try public transportation; 49.28% said that they would not likely try public transportation even if improvements were made.

OTHER DOCUMENTATION

CITY OF CORAL SPRINGS
 MOBILITY HUB STUDY
 TRANSIT RIDERSHIP SURVEY RESPONDENTS
 MONDAY OCTOBER 21, 2019

Broward County Transit Bus Route 34 heading eastbound at Sample Road and University Drive stop.

The starting and transfer location for the green and blue community shuttle routes has no signage or bus/shuttle markings. Many designated stops along the route also do not have signs.

Walking path created from passengers transferring from Bus Route 2 & 102 northbound to Bus Route 34 westbound.

Bus riders, including a cyclist, waiting at shaded shelter for BCT 34 eastbound.

Community shuttle route stop signs that were standing were mostly faded and unreadable.

The majority of Coral Springs community shuttle passengers spoke Haitian-Creole or Spanish.
